## MARKET REVIEW & IHSG OUTLOOK

Indeks pada perdagangan kemarin lalu ditutup menguat pada level 7127. Indeks ditopang oleh sektor Financials (0.719%), Basic Materials (0.694%), Infrastructures (0.414%), Properties & Real Estate (0.344%), Consumer Cyclical (0.315%), kendati dibebani oleh sektor Healthcare (-0.058%), Energy (-0.095%), Industrials (-0.126%), Consumer Non-Cyclical (-0.381%), Transportation & Logistic (-1.152%), Technology (-1.168%) yang mengalami pelemahan yang kurang signifikan. Indeks pada hari ini diperkirakan akan bergerak pada range level support 7100 dan level resistance 7150.

Indeks Dow Jones Industrial Average naik 87,06 poin (+0,25%) ke 34.583,57 pada sesi penutupan fajar tadi (Waktu Indonesia Barat/WIB). S&P 500 tumbuh 19,06 poin (+0,43%) ke 4.500,21 dan Nasdaq bertambah 8,48 poin (+0,06%) ke 13.897,3.

Hari ini masih ada harapan nasional masih memiliki amunisi untuk menjadi energi tambahan penguatan, yakni saham konsumen dan ritel. Sebagai negara dengan kontribusi konsumsi publik mencapai 54% dari kue Produk Domestik Bruto (PDB), sektor konsumen menjadi dan ritel berpotensi mendapatkan angin segar penguatan kinerja di tengah pelonggaran aktivitas masyarakat sejak awal tahun ini. Momentum Puasa dan Lebaran, yang secara historis menyumbang kenaikan konsumsi (dan inflasi) nasional bakal berjalan normal kembali, setelah dalam dua tahun terakhir loyo akibat pandemi dan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM). Harap dicatat, sektor konsumen non-siklikal menyumbang 12,31% kapitalisasi pasar nasional, berada di posisi kedua setelah sektor keuangan yang persentasenya menjadi teratas sebanyak 36,13%. Sektor teknologi berada di posisi ketiga dengan porsi 9,92%.

Oleh karena itu, ketika berbicara mesin penguatan bursa nasional, maka sejauh ini baru tiga mesin yang bergerak maksimal yakni keuangan, teknologi dan industri dasar (sektor komoditas logam). Satu mesin belum beroperasi maksimal, yakni konsumen. Mengutip JPMorgan Asset Management dan Goldman Sachs, optimisme pasar global terbentuk karena keunikan ekonomi Indonesia yang justru mendapatkan berkah di tengah konflik Ukraina-Rusia. Kedua bank investasi global tersebut memang tidak secara spesifik menyebutkan sektor konsumen dengan menyebutkan sektor komoditas, keuangan, dan prospek teknologi di Tanah Air masih akan kuat.

Namun demikian, sulit melupakan bagaimana kisah pemulihan ekonomi di Indonesia senantiasa terkait dengan konsumsi masyarakat. Jika konsumsi masyarakat sudah pulih, tentu saja tidak ada alasan untuk menafikan prospek saham sektor konsumen tersebut. Oleh karenanya, investor saham di dalam negeri bakal memantau rilis Indeks Keyakinan Konsumen (IKK) pada hari ini. Menurut proyeksi Tradingeconomics, indeks yang mengukur kecenderungan kenaikan/penurunan belanja masyarakat ini diprediksi di angka 116, membaik dari posisi sebelumnya 113,1. Jika proyeksi tersebut terkonfirmasi, maka pemulihan sektor konsumsi dan ritel tak ternafikan, yang pada akhirnya bakal memutar mesin keempat bursa nasional, yakni sektor konsumen nonsiklikal. (source : CNBC Indonesia)
